PROFILE

Recent graduate in Information Engineering for Video Games and Virtual Reality (October 2026, final grade 107/110). I design mechanics and then build them: data-driven systems in Unity/C#, enemy AI in Unreal, and a Meta Quest 3 VR prototype that I developed alone for my thesis. Looking for a junior technical designer or gameplay programmer role in a team where I can grow alongside experienced developers.

PROJECTS

Ashen Sea Souls-like action adventure · team of 3 · Unreal Engine · March–May 2026

- Implemented two enemy archetypes: a golem using Blueprints, Animation Blueprint and a state machine; a spider with procedural movement (Control Rig) and Behavior Tree AI.
- Built enemy attacks and projectiles, including boulders thrown by the golem that shatter on impact.

Fact Checker 3D serious game about fake news · university team · Unity, C#, Blender · Oct 2025–Feb 2026

- Designed and wrote the news system: a data structure configurable in Unity holding every field needed to build each news item.
- Proposed the mechanics and user flows; built the cutscenes (animations and dialogue), the journalist's core gameplay, low-poly 3D assets and Mixamo animations.

Gift Among Memories Narrative game · solo project · RPG Maker MZ, HTML5 · Feb 2026

- Designed, built and published on itch.io in about two weeks: story, dialogue, maps, events, UI and testing. Playable in the browser.

Other work: Under the Bed (Attic Studio Halloween Jam, Oct 2026, team of 2: all programming in Unity/C#, playable in the browser); Before the Last Train (Artenauts game jam, Unity); 2D/3D asset packs on itch.io (Blender, Aseprite); Galaxy Production, public devlog and live development streams (2026).

SKILLS

Engines: Unity (C#), Unreal Engine (Blueprints, Animation Blueprint, Behavior Tree, Control Rig), Meta XR SDK. Learning: Godot (GDScript).

Programming: C# (intermediate), Python (FastAPI), C/C++ (basic), JavaScript and React Native (personal projects), Git (team use).

Design: Level design, UX and onboarding, GDDs, user stories and acceptance criteria, prototyping, playtesting.

Tools: Figma, Miro, Visual Studio Code, Blender, Rhinoceros, Aseprite, Mixamo.

EDUCATION

BSc in Information Engineering for Video Games and Virtual Reality (L-8)
Università Politecnica delle Marche, Ancona, Italy · 2023–2026
Final grade 107/110 (graduated 22 October 2026). BSc thesis and internship: VR Immersive Journalism, a VR prototype for Meta Quest 3 in Unity/C# (solo project). Key courses: Serious Game Design and Programming 30/30 cum laude, Game Design and Animation 30/30, 3D Graphics and Modelling 30/30, Advanced Video Game Programming 29/30, UX Design and 2D Graphics 29/30.

High school diploma in Science (Applied Sciences track)
Liceo F. Masci, Chieti · 2023

LANGUAGES AND MORE

Languages: Italian (native) · English B2 (ESB certificate, 2023).

Experience: Seasonal bartender, summers 2021–2026 (beach clubs in Abruzzo): customer service and teamwork under pressure.

Driving licence: A1 and B.

I authorise the processing of my personal data under EU Regulation 2016/679 (GDPR).
